Art Unit: 3737

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 25-75, drawn to handheld beamformer and an interface unit cable-connected to a computer, classified in class 600, subclass 437.
  - II. Claims 75-80, drawn to a personal-computer-based ultrasound imaging system, classified in class 600, subclass 447.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the personal computer platform combination as claimed does not require the particulars of the handheld/interface-cabling subcombination as claimed because the PC-based device may occur in a unitary housing or in the context of no cabled interface. The subcombination has separate utility such as in relation to handheld beamformers.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter (see for example the

Daigle patents (US5127409 - enclosed with this correspondence - Fig. 9 and its attendant col. 10-12 discussion and 5795297 Fig. 1 provided by applicants in the IDS of 10-30-2002) in relation to general PC-based systems. considered in distinction to portable handheld beamformers), restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claims 1-24 stand withdrawn from consideration after election without traverse in paper No. 9 filed 02-04-2002.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Francis J. Jaworski whose telephone number is (703) 308-3061.
